

TOP CYBER SECURITY THREATS NOW

PHISHING ATTACKS

SERVER/NETWORK

REMOTE EMPLOYEES

SOCIAL ENGINEERING

CYBER ATTACKS

REMOTE EMPLOYEES: Insecure passwords. (Use as a passphrase). Personal use browsing/shopping on work computer (separate personal and work accounts). Employees forget to restart computers everyday so security updates will take effect. Lack of Remote Work Contingency Policy Review.

PHISHING ATTACKS: 90% employee error by clicking links and opening attachments from unknowns and fake emails. Lack of effective communication by leadership on policy, and critical Training to combat social engineering and phishing.

SOCIAL ENGINEERING: Employees, especially executives and accounting staff, are targeted through email, social media, phone, text, tailgating. Lack of employee training, testing and communication. Need of a Cyber expert, vCISO partner, to help identify network weaknesses with remote vulnerability scans.

CYBER ATTACKS: Ransomware, Malware, ATO Account Take Over, Man-in-the-middle attack, APT Advanced Persistent Threat. Need of a partner for Endpoint MDR, Incident Response and digital forensics to quickly and effectively respond to cyber attacks.

SERVER/NETWORK: Out of date software, not using secure Cloud Storage, Local storage use. Insecure Passwords of Employees, Routers, printers, too many insecure admin accounts. Insecure remote access and end points, open VPNs and RDP (3 million internet-exposed RDP ports reported before the shift to work from home [Stephen Cobb]). Insecure Passwords of Employees, Routers, printers, too many insecure admin accounts. Endpoint MDR, Incident Response and digital forensics to quickly and effectively respond to cyber attacks 24/7/365 to detect and defend against malicious attacks from multiple endpoint intrusions.

8 TELE-CYBER PROGRAMS BY ABACODE TO GET YOUR ORGANIZATION SECURED NOW!

24 / 7 / 365 Endpoint MDR

Remote Cyber Risk Assessment

Remote Work Contingency Policy Review

Remote vCISO Consultation

Digital Forensics Incident Response - Day One

Targeted Phishing Campaigns

Automated External Network Scans

External Technical Penetration Testing

A robust cybersecurity program has become a condition of doing business as clients, vendors, suppliers and industry regulations are driving compliance.

Abacode can help with a proactive approach & process designed to reduce complexity, vendor fatigue and knowledge gaps that may exist in your organization. Visit us online or call to learn more about Abacode Services.
