

CYBERSECURITY COMPROMISE ASSESSMENT FOR MERGER & ACQUISITION TRANSACTIONS

Cybersecurity breaches can destroy a company's reputation and severely impact its bottom line and, subsequently, the investors' returns.

Managing risk is at the core of any private equity portfolio strategy, and cybersecurity represents more of a risk now than ever before. The ability to assess an M&A targets' cybersecurity state quickly and efficiently is of utmost importance, and continuously monitoring portfolio companies post-acquisition is essential.

EVALUATE YOUR ENTIRE PORTFOLIO OR JUST YOUR NEXT ACQUISITION

We can develop a plan to manage the risk of your portfolio and provide direction and tools to be used during acquisition.

IDENTIFY YOUR KEY RISK AREAS

Putting a spotlight on your cybersecurity risks is our job. Seeing the risks from inside, even for an advanced in-house cybersecurity team, can be difficult.

STANDARDIZED INVESTIGATING BUILT TO HAVE THE LEAST IMPACT ON BUSINESS

Adding another complicated, lengthy and expensive process to an acquisition is what we aim to avoid. We know what needs to be evaluated, what doesn't, and what you need to know.

- Cybersecurity specialists complete a forensic level inspection of your network
- Gives an overview of a company security posture
- Flags security flaws and identifies past data leakage
- Detailed report highlights areas investigated and provides recommendations for remediation
- Identifies unknown malware, persistent backdoors, and shadow software
- Minimal disruption to IT department and users
- Remediate active breaches and understand impact through in-depth threat hunting
- Flag security flaws/past data leakage through identification of legacy compromise
- Operational activities are not impacted: no system downtime or reconfiguration
- Prove security effectiveness to customers and suppliers
- Give reassurance prior to a merger, acquisition or partnership
- Give reassurance that your network is devoid of security compromise

About Abacode

Abacode is a Managed Cybersecurity & Compliance Services Provider (MCCP).

Abacode combines leading technologies and professional services to implement holistic, framework-based Cybersecurity and Compliance programs for clients throughout the world. Our unique model empowers organizations to make objective and reasoned security investments based on their business needs, budget, and risk tolerance and ultimately transform their cybersecurity challenges into a competitive advantage. Abacode enables clients to implement a Cyber Capability Maturity Model and consolidate all cybersecurity initiatives under one roof. Offices in the Americas and Europe.
